

Outline

- Turkish Makam Music
- Research Corpus
- Test Datasets

Sûzidil Peşrev

Usul: Devrikebîr (28/4)
♩ = 72 ⇒ 4 Dk 40 Sn

Beste: Tanburî Ali Efendi (1836 - 1890)

1. HANE

Turkish Makam Music

- *Makam* ~ melodic structure

Makams are modal structures

Melodies typically revolve around an initial tone and a final tone.

The final tone is synonymous to *tonic*.

500+ *makams*, ~150 of them are still alive

- *Usul* ~ rhythmic structure

A group of strokes with different velocities, e.g. the beats and downbeats

- *Form*

Instrumental, vocal compositions, religious compositions...

Tuning

Arel-Ezgi-Uzdilek is the mainstream theory

Uses 24 tones from 53-TET system

Corpus & Dataset

CompMusic

- Mainly focuses on *melodic* and *rhythmic* characteristics

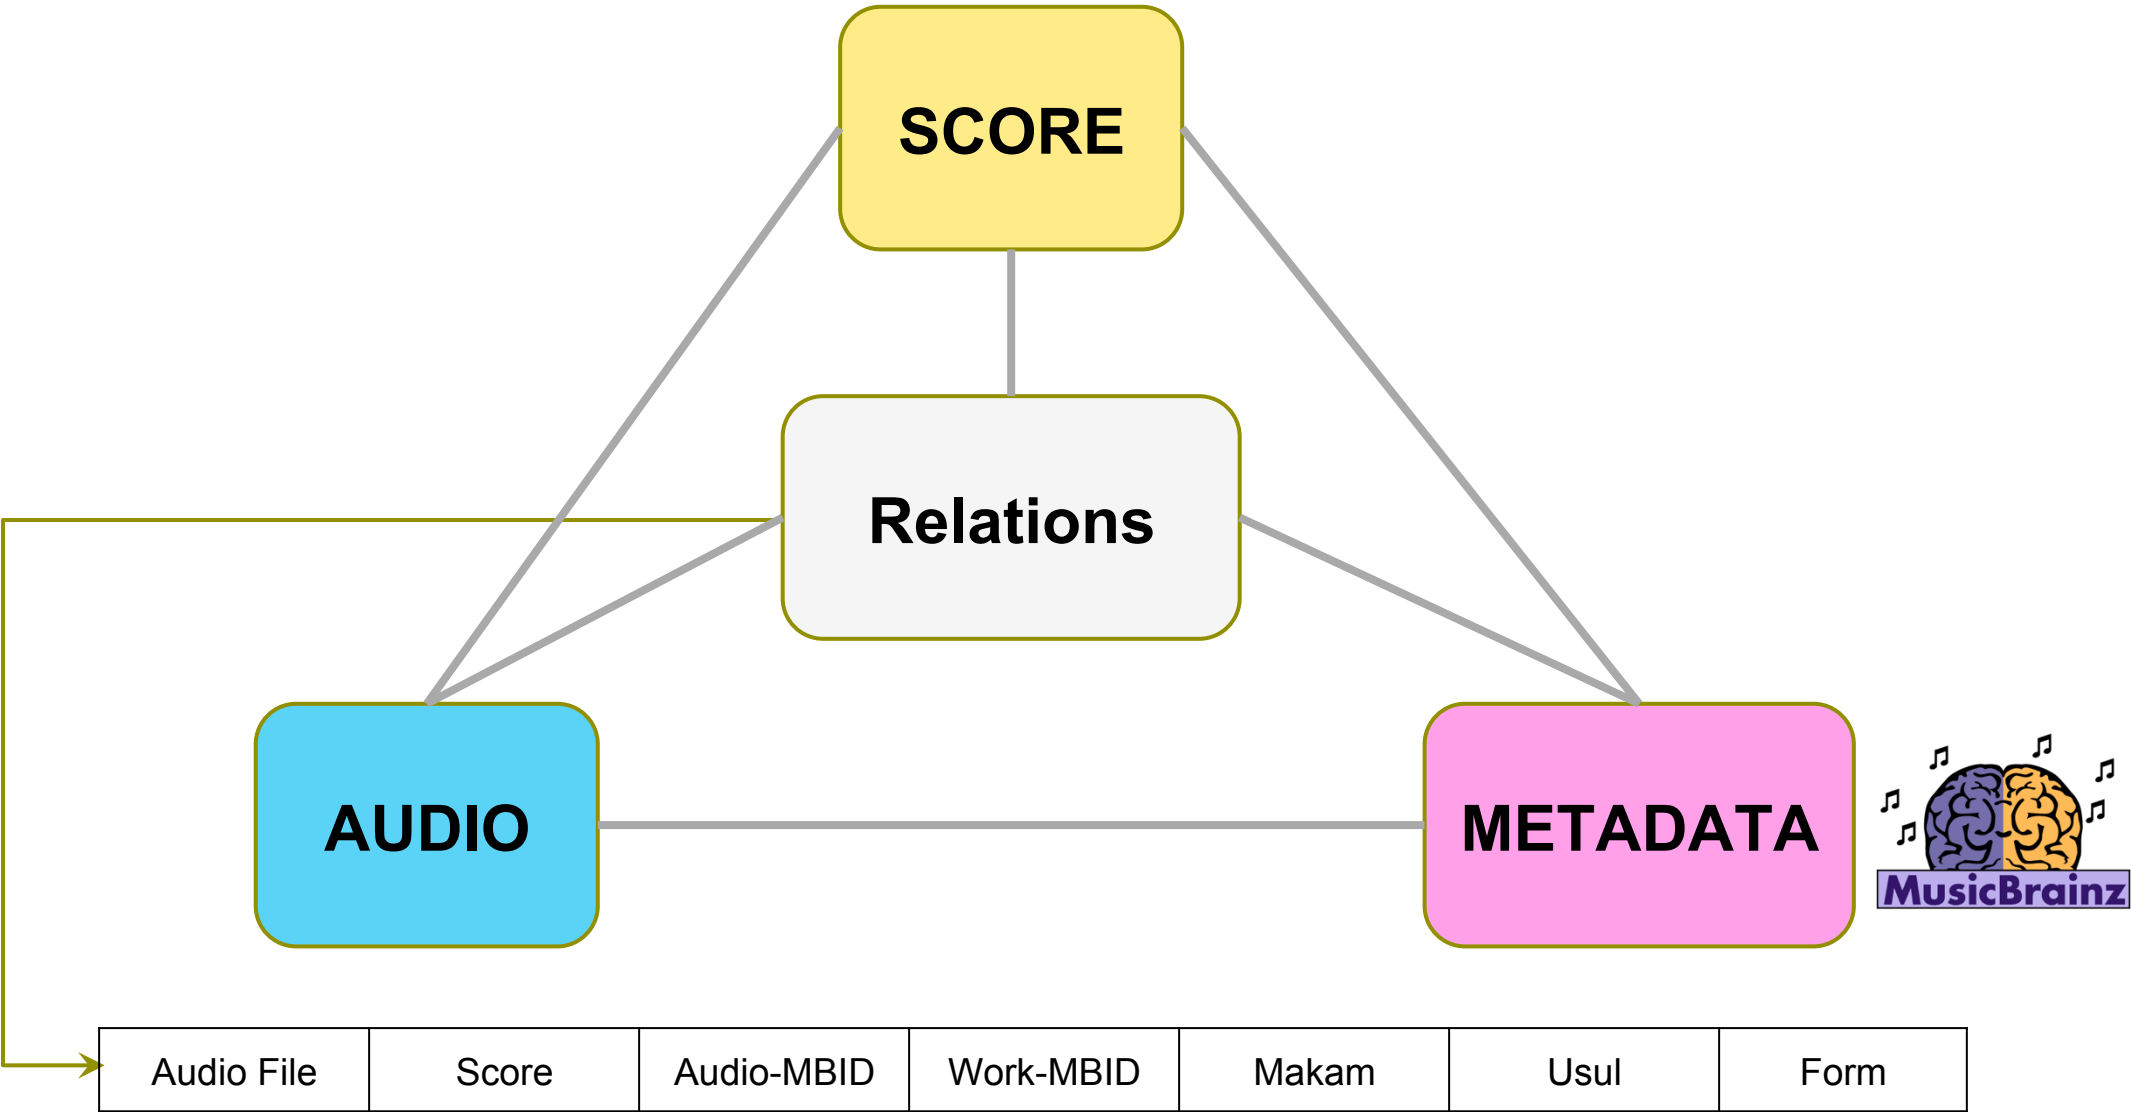

Corpus

- Collection of music documents, representing a specific tradition
- Audio recordings, music scores, lyrics and editorial metadata...

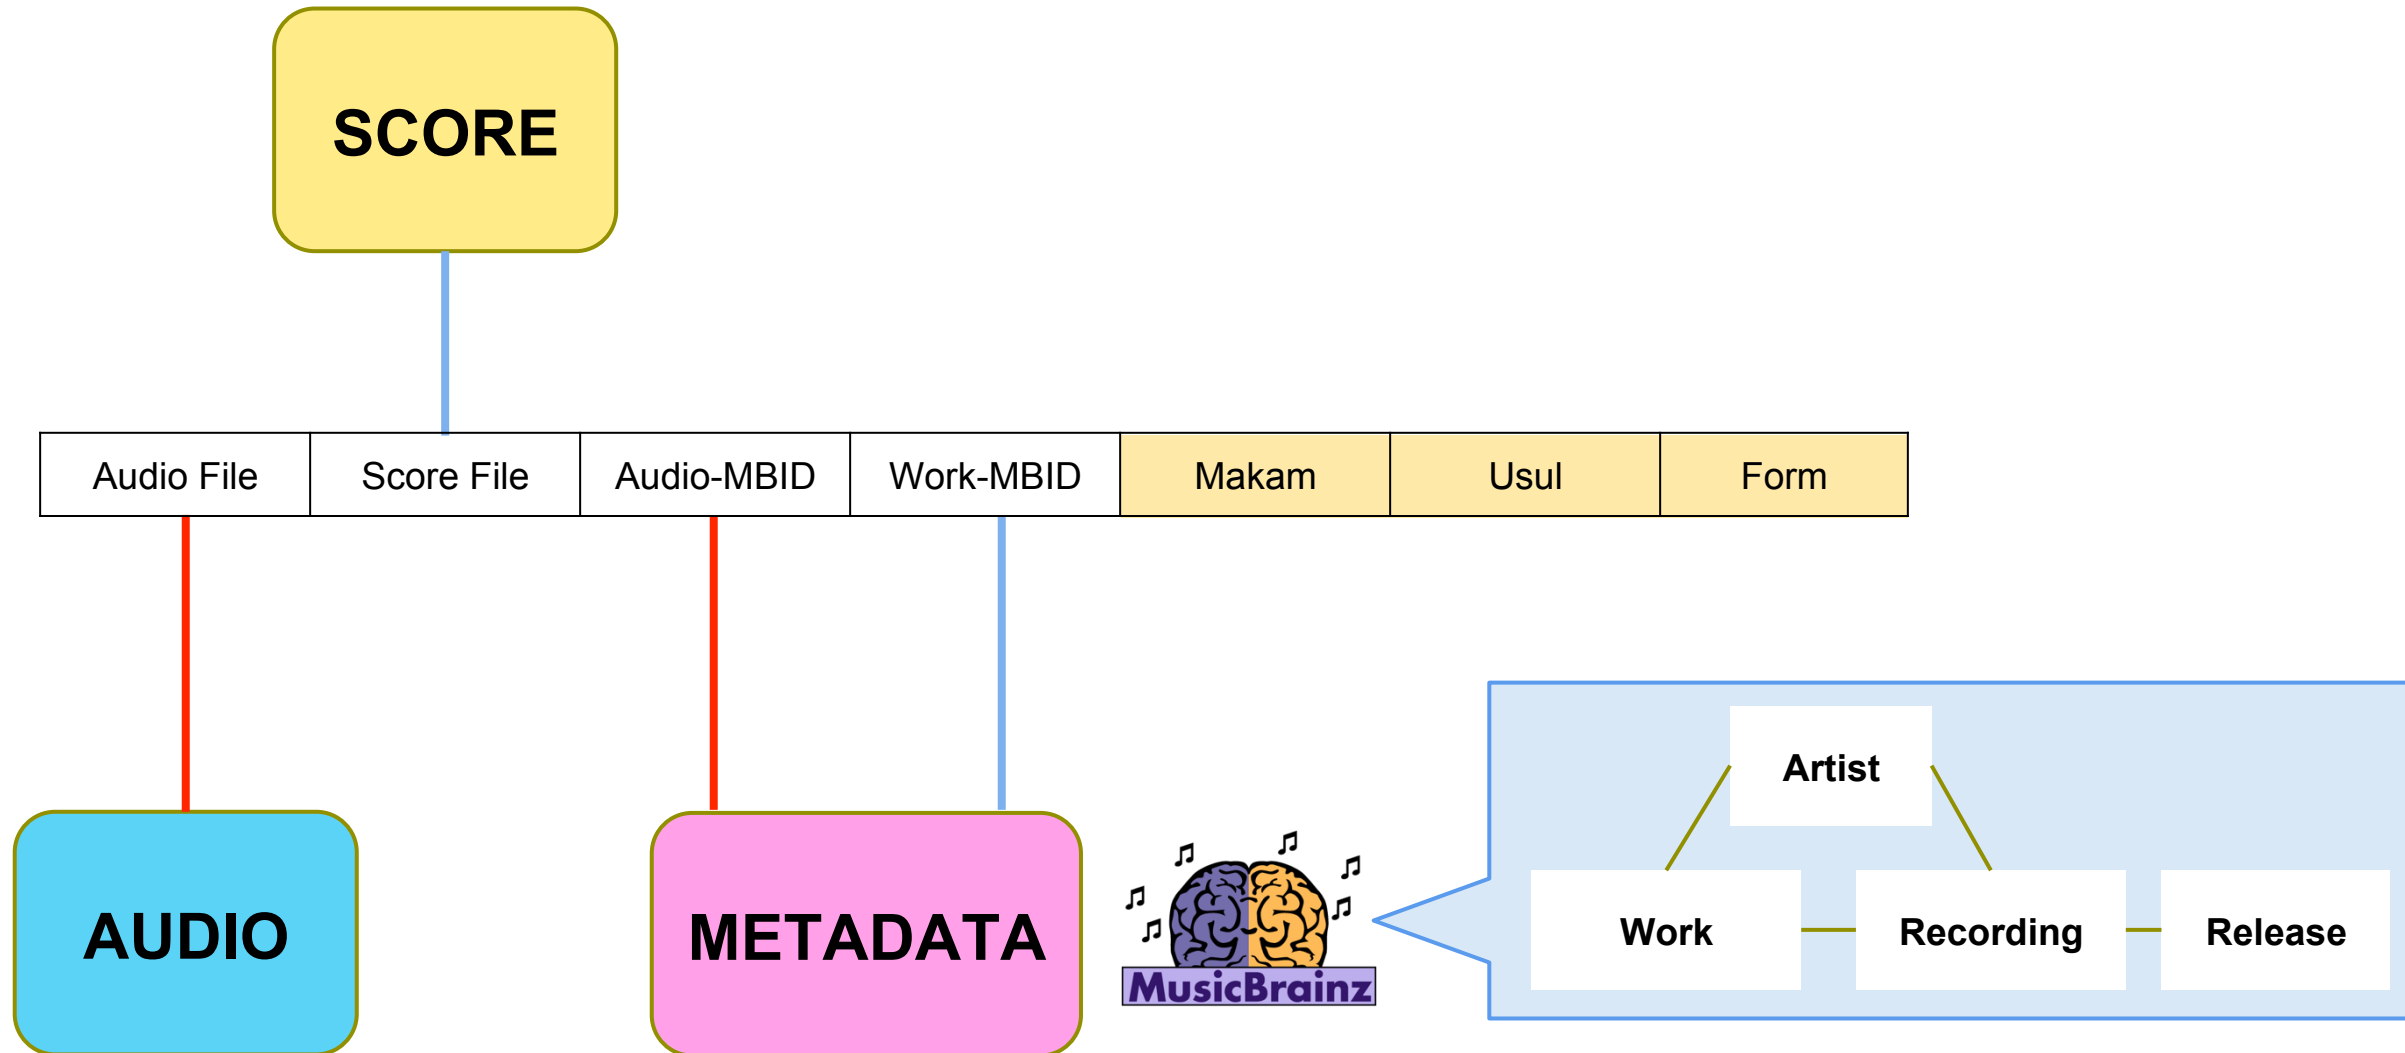

Test Dataset

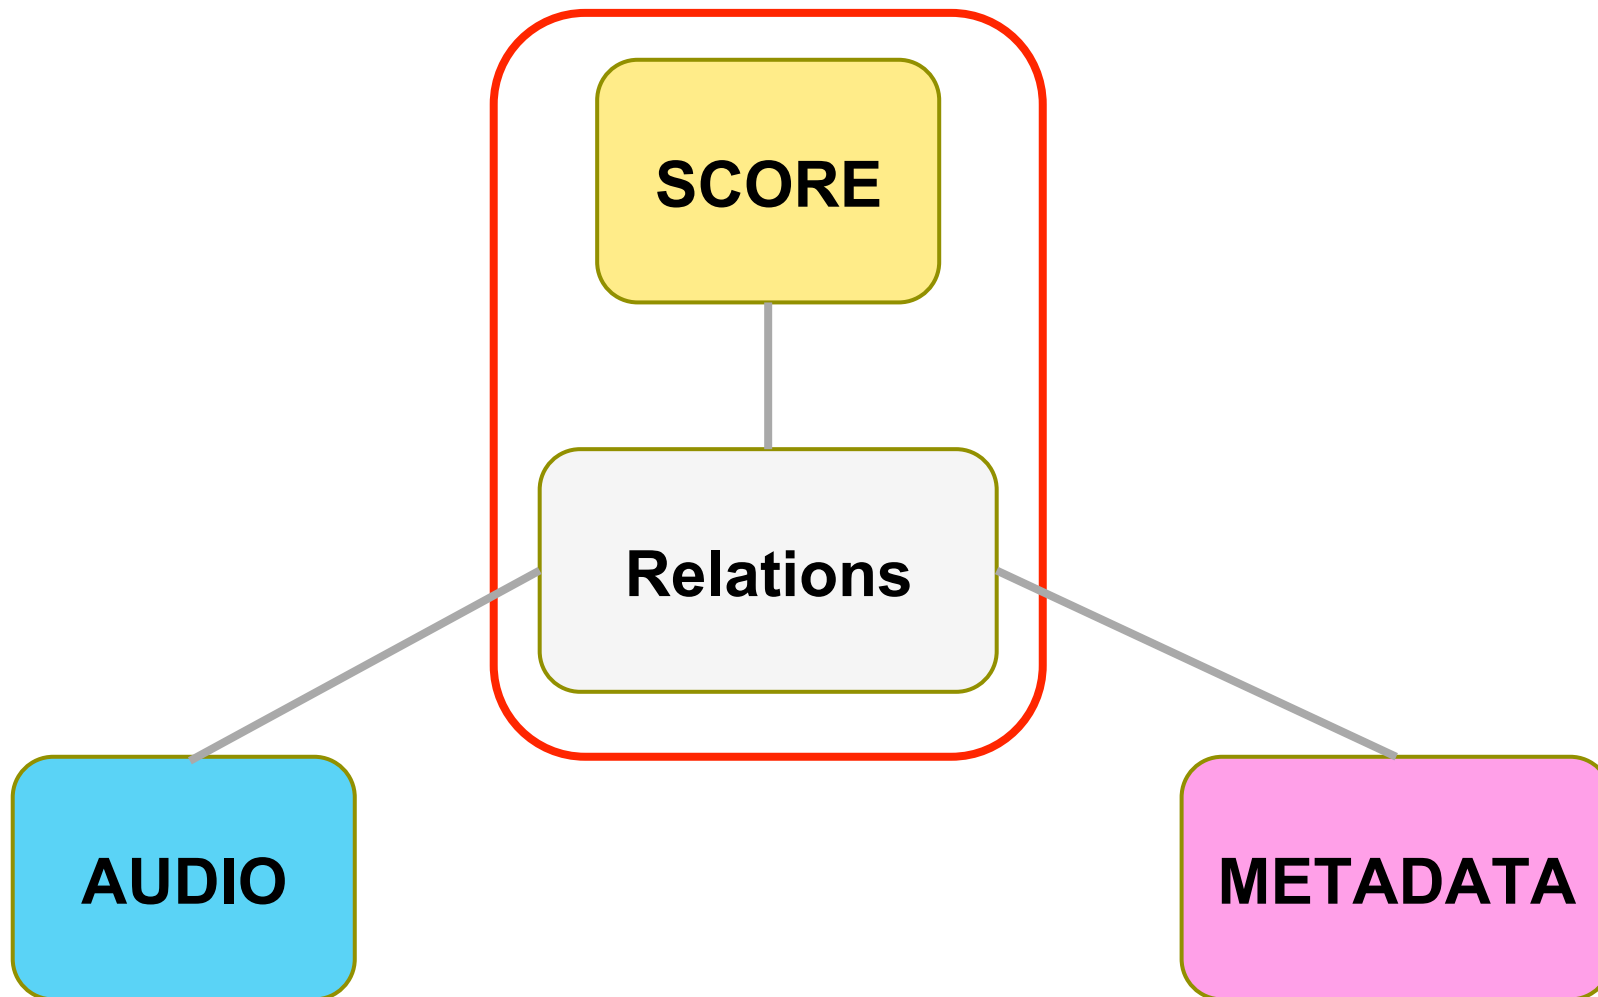

- Collection for a specific research task
- To *test*, *calibrate* and *evaluate* methodologies
- Can be a subset of *corpus* or include data which is not in *corpus*

Research Corpus

Research Corpus

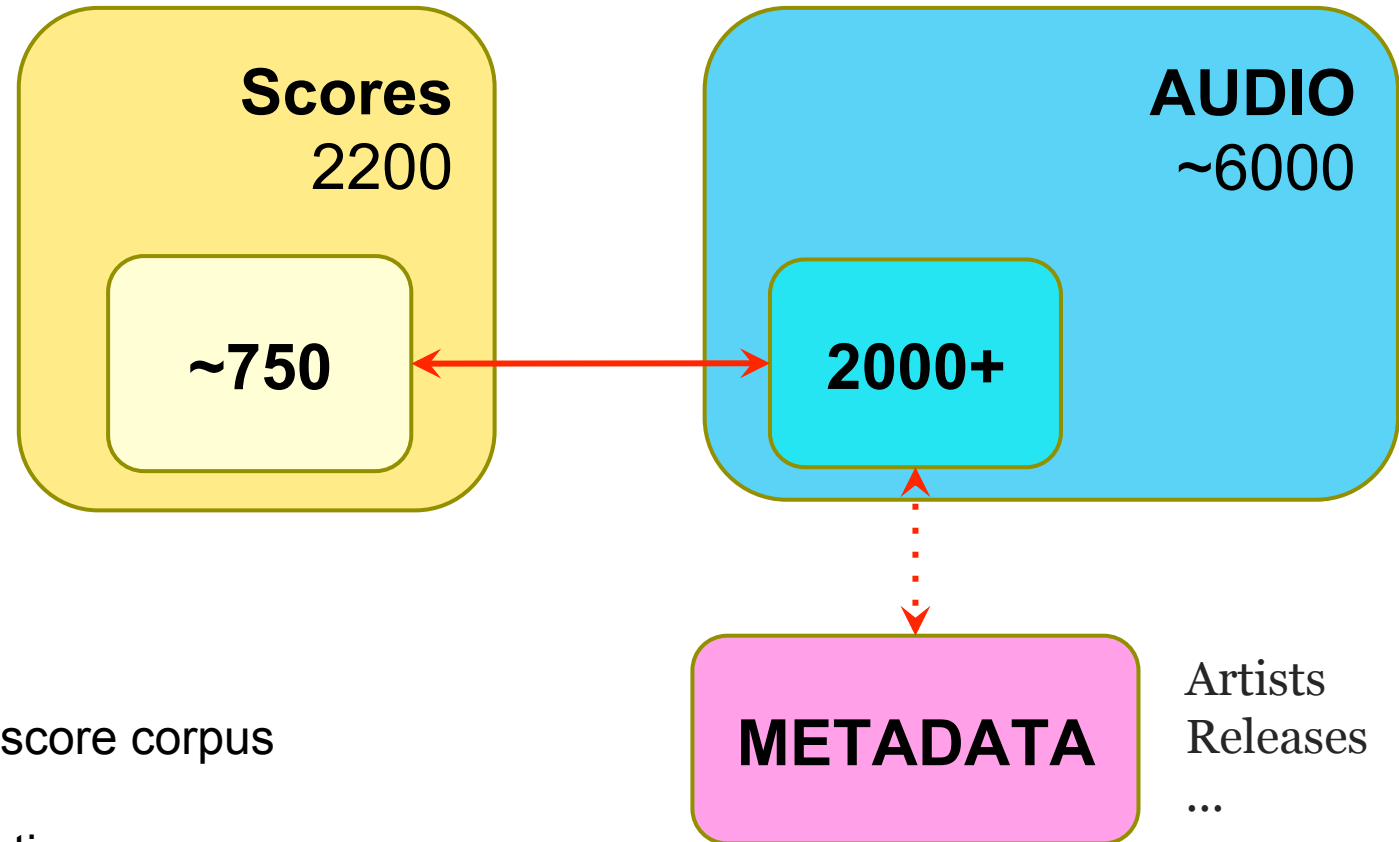

Score Corpus

	#
scores	2200
makams	150+
usuls	80+
forms	60+

- The biggest machine-readable score corpus for Turkish makam music.
- Covers the existing score collections

Score Corpus

- Conventional naming
- Notes in 53-TET
- Lyrics
- Nominal tempo
- Section
- Measure
- Machine Readable -> MusicXML

makam	form	usul	title	composer

Score Corpus

What is MusicXML?

```
<note>
  <pitch>
    <step>C</step>
    <octave>4</octave>
  </pitch>
  <type>whole</type>
</note>
```

Advantages of MusicXML in our case

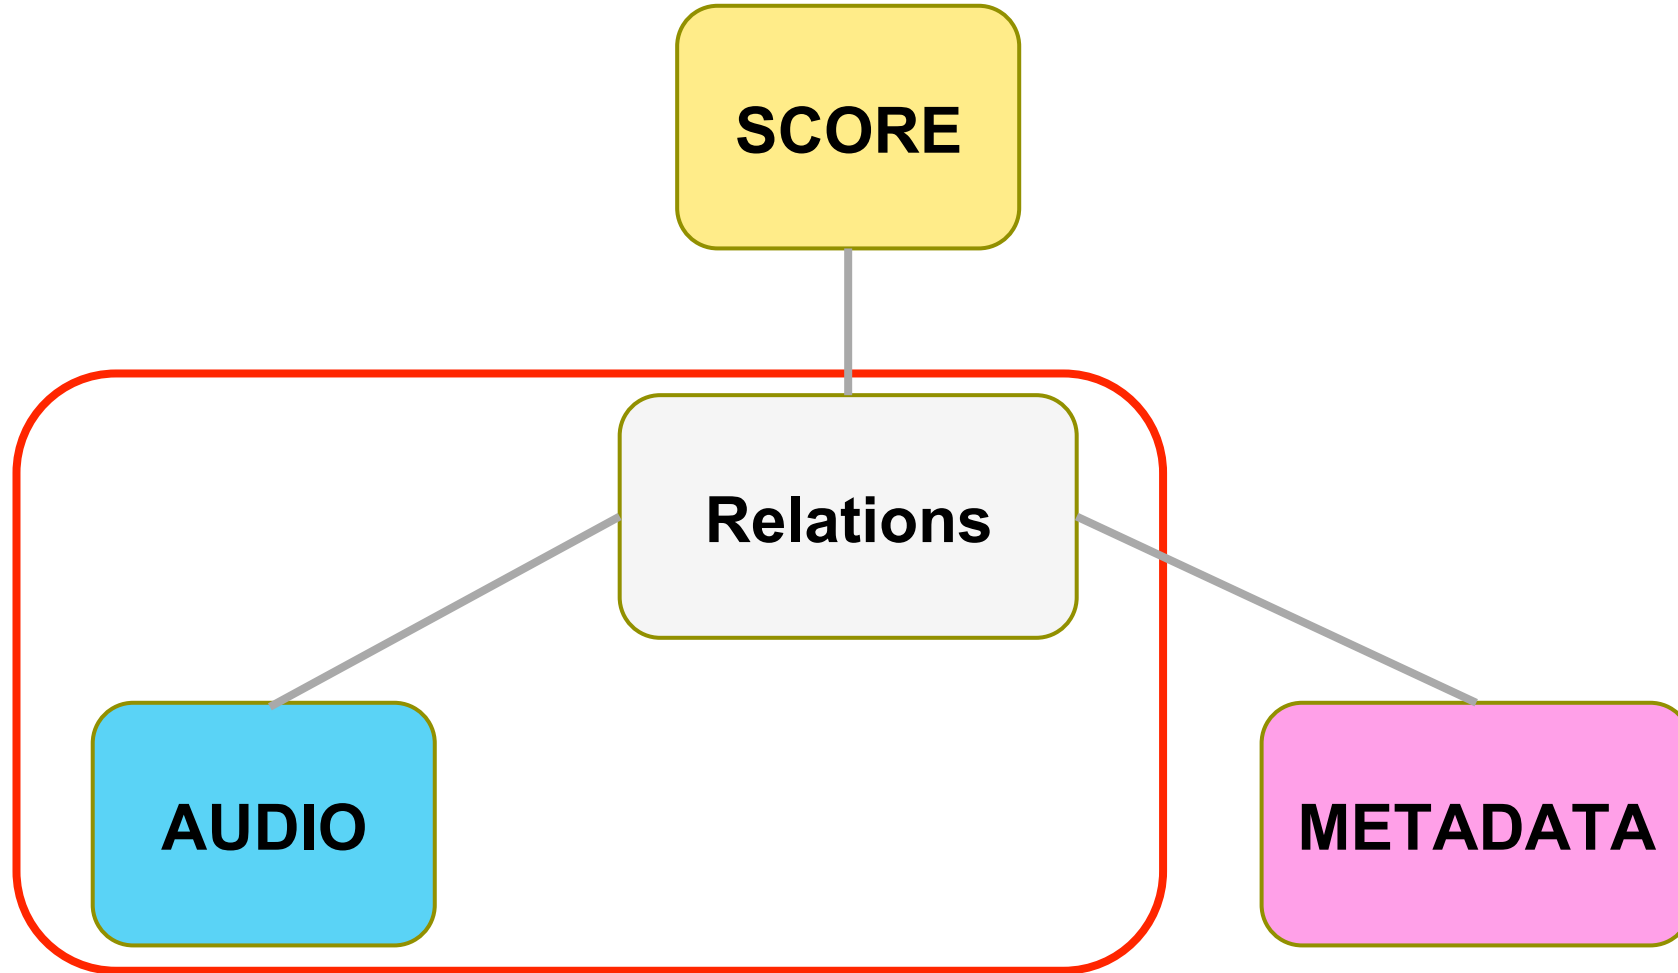

- Supports makam music symbols
- Compatible with well-known software: MuseScore, Finale, Sibelius
- Abstract sheets for users
- Ability to import and modify
- Easy to share new sheet-music
- Good for community-contribution
- Appropriate for end-users and researchers

Score Corpus

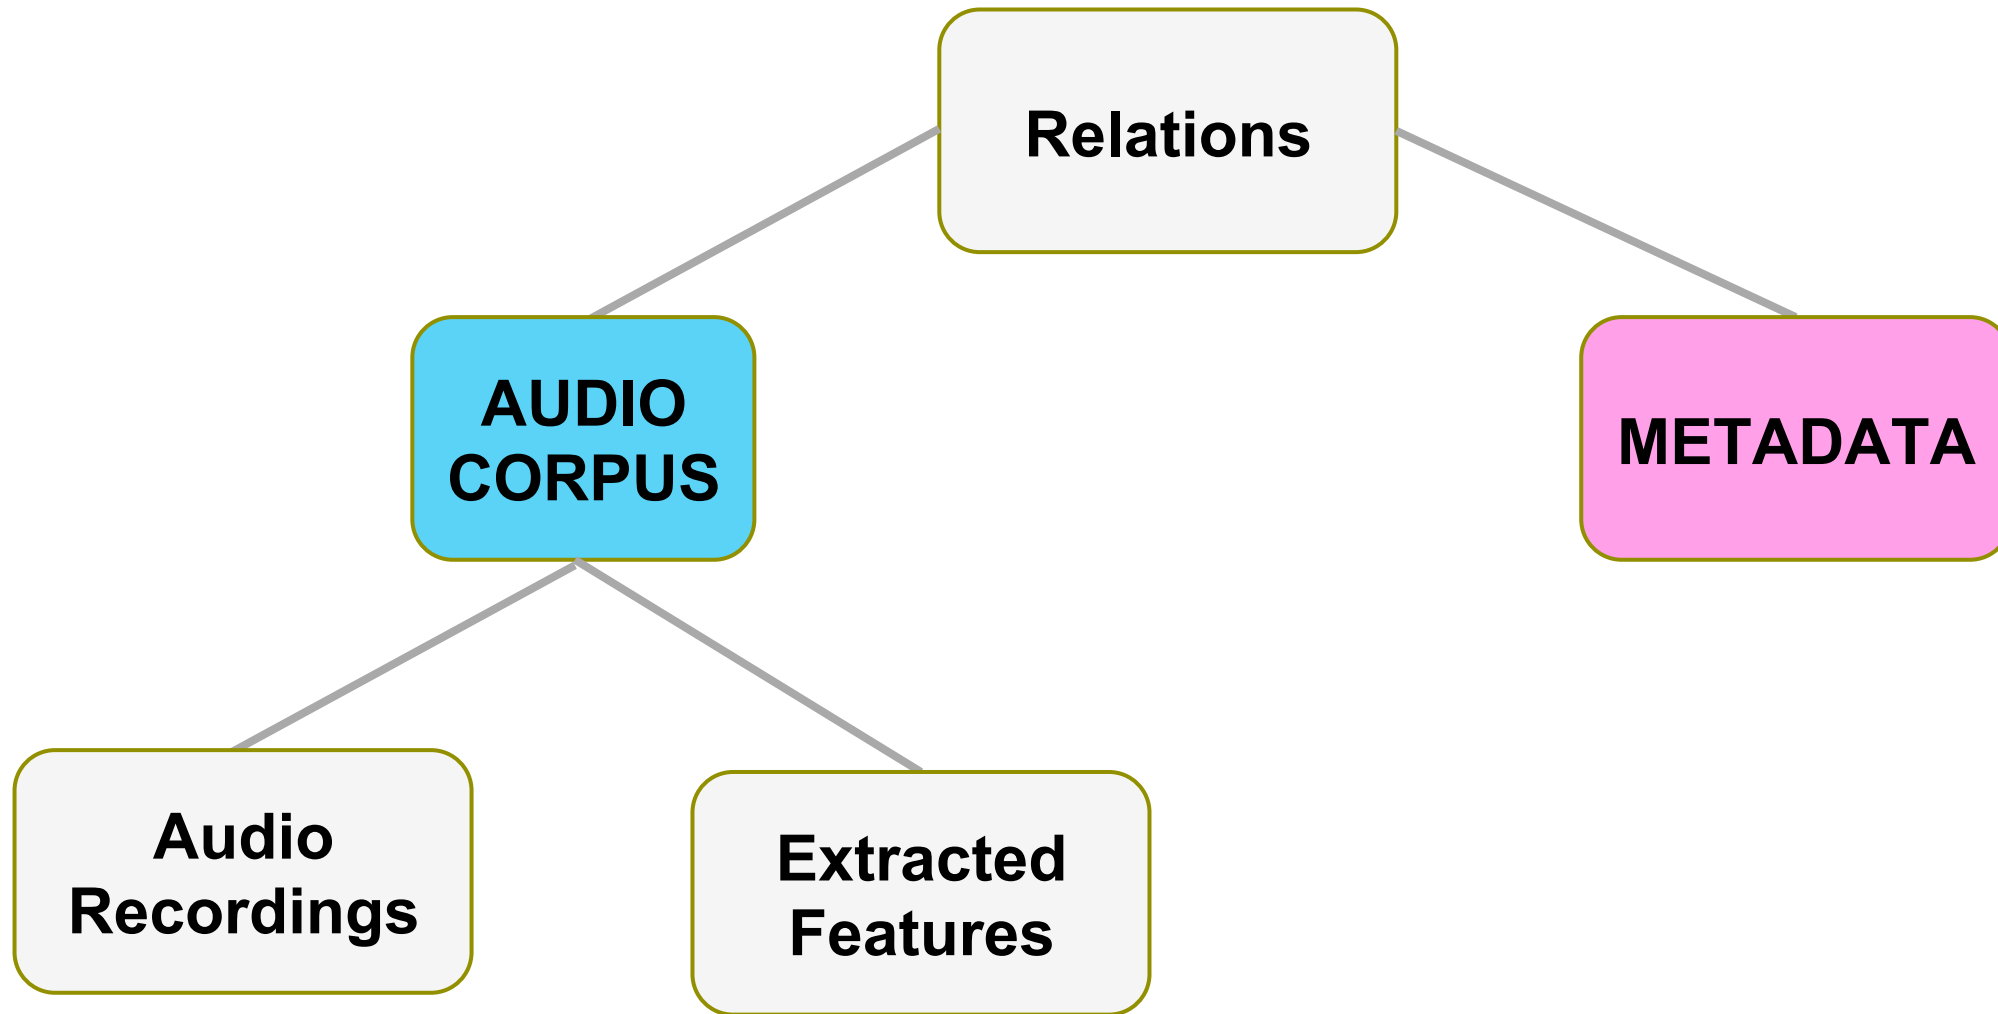

Publicly available on:

<https://github.com/MTG/SymbTr/releases/tag/v2.0.0>

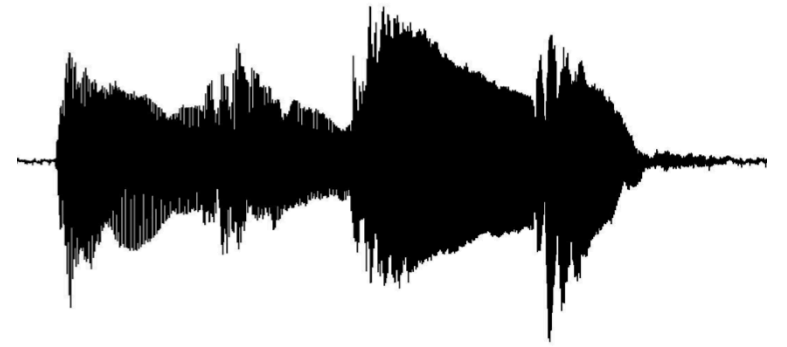

Audio Corpus

Audio Corpus

- Audio Recordings
 - 5953 Audio Recordings ~ 375 hours of play time
 - Commercial & Non-commercial
 - Solo & Ensemble recordings
 - Classical, Folk & Religious repertoire

Audio Corpus

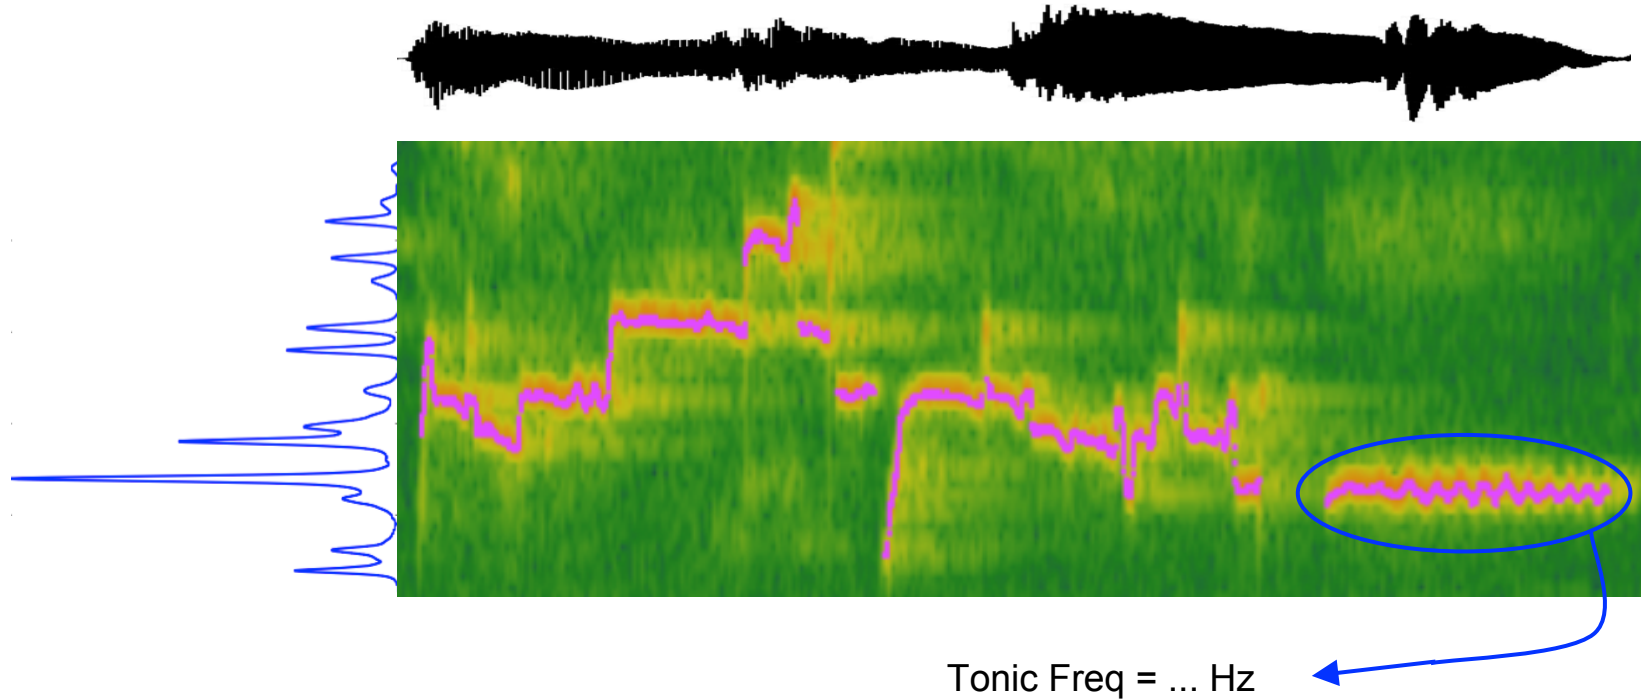

- Audio Features

- Predominant Melody

- Pitch Histogram

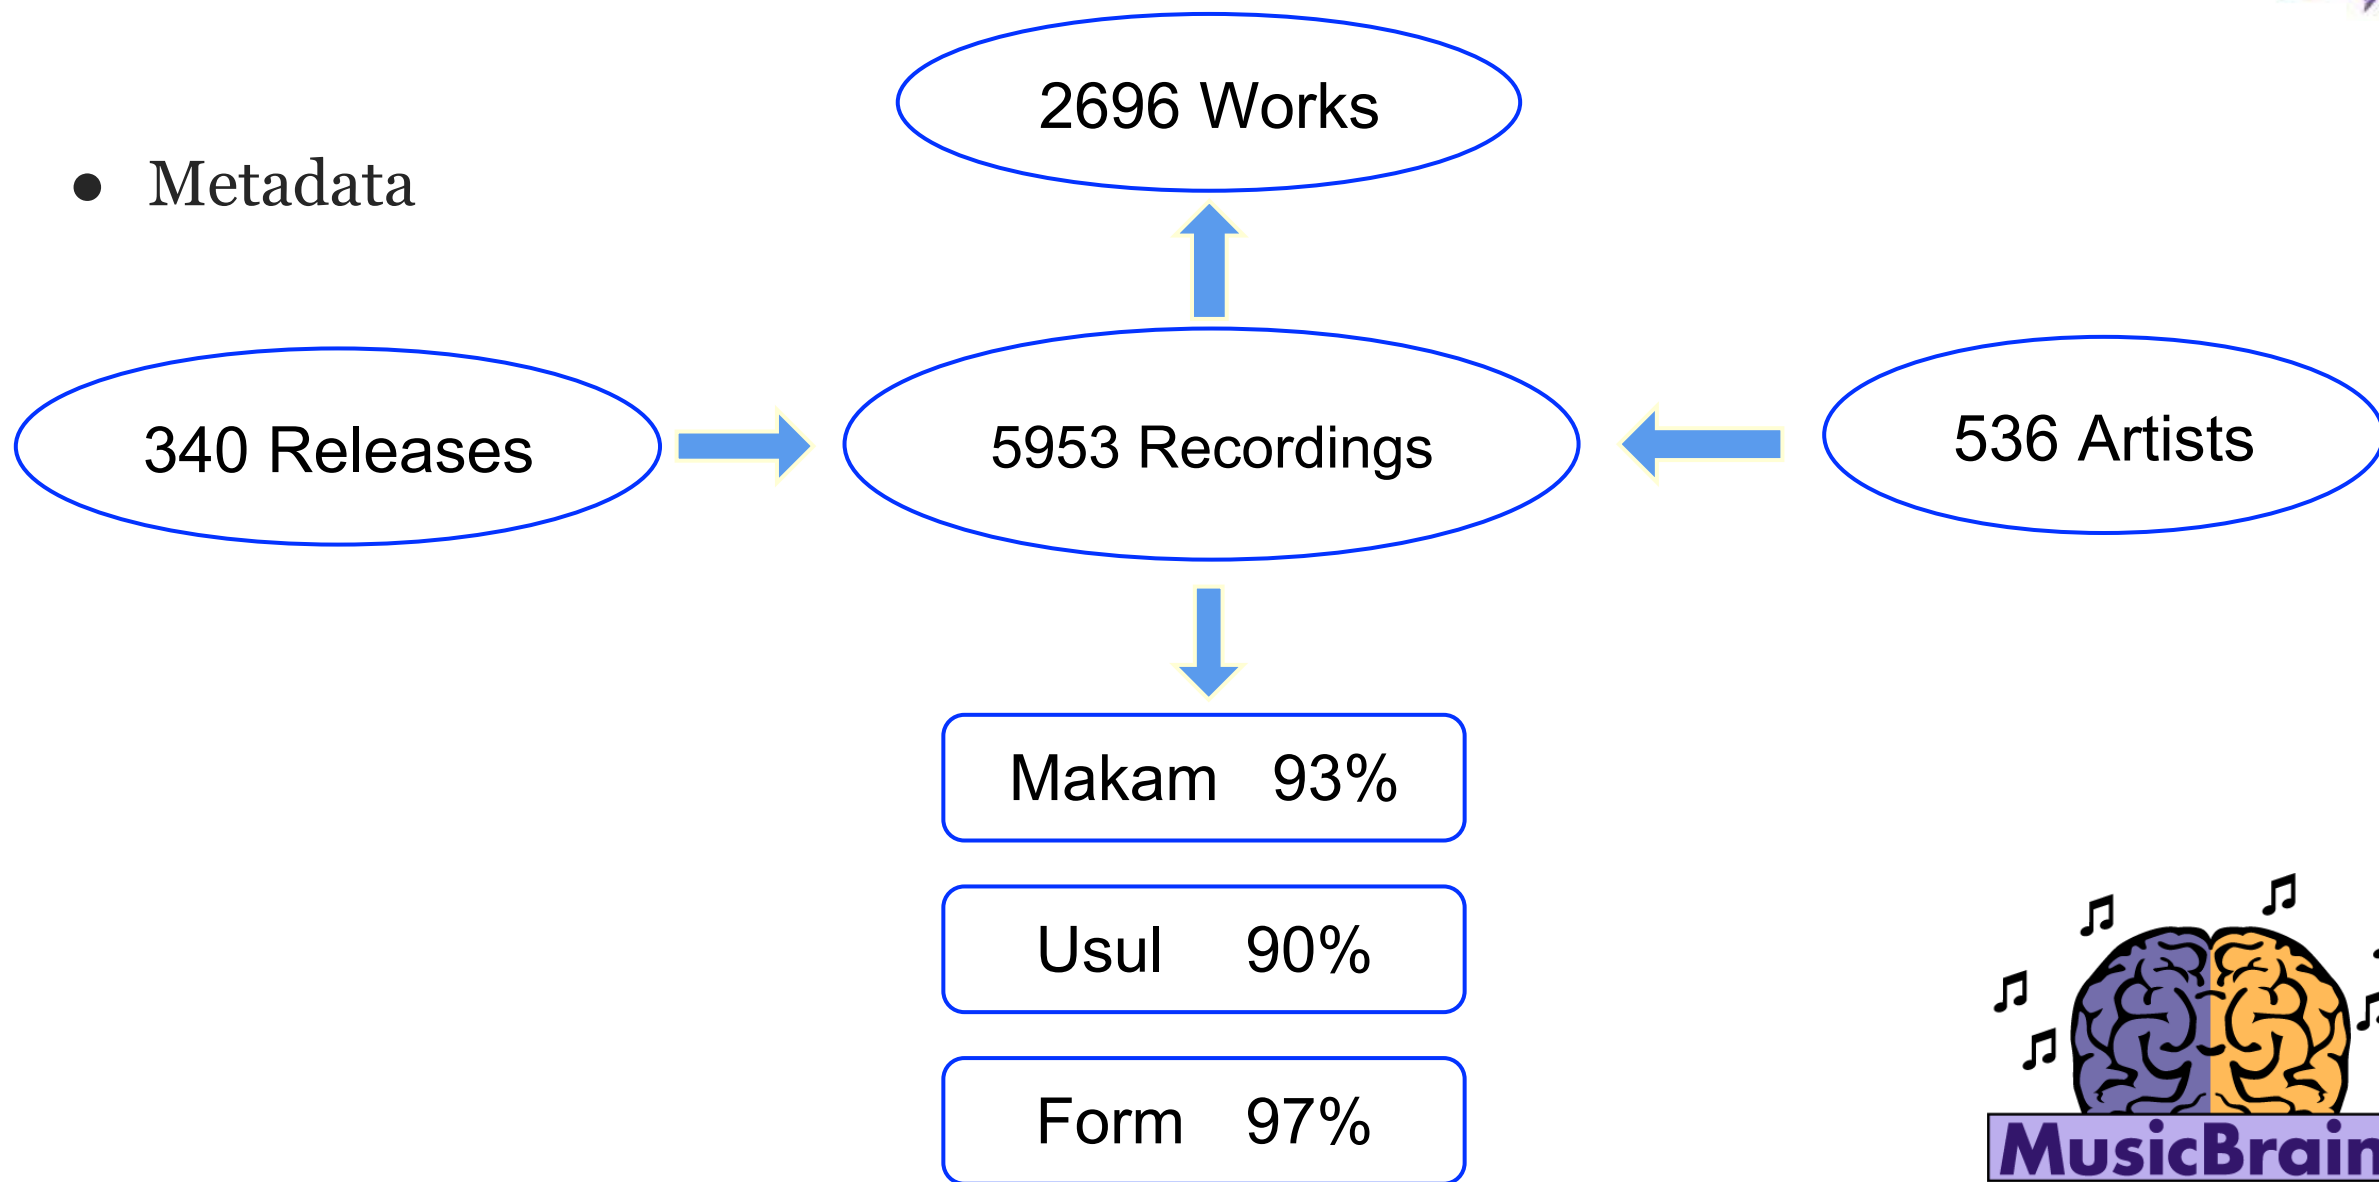

- Tonic Frequency

Tonic Freq = ... Hz

Test Datasets

- Melodic and Symbolic Phrase Test Dataset
- Tonic Test Dataset
- Section Test Dataset
- Audio - Score Alignment Test Dataset
- Audio - Lyrics Alignment Test Dataset

<http://compmusic.upf.edu/datasets>

Test Datasets

- Melodic and Symbolic Phrase Test Dataset
 - 3 experts
 - 31362 manual annotation , 899 scores

Test Datasets

Section Test Dataset

- 2095 sections annotated in 257 audio recording of 58 compositions.

Uşşak Saz Semâi

Alkan Semaî 2 = 112 *Jayzan Salih Usta*

4. Hane

Test Datasets

Audio - Score Alignment Test Dataset

- 6 audio recordings of 4 compositions
- 51 sections in total
- 3896 note annotation

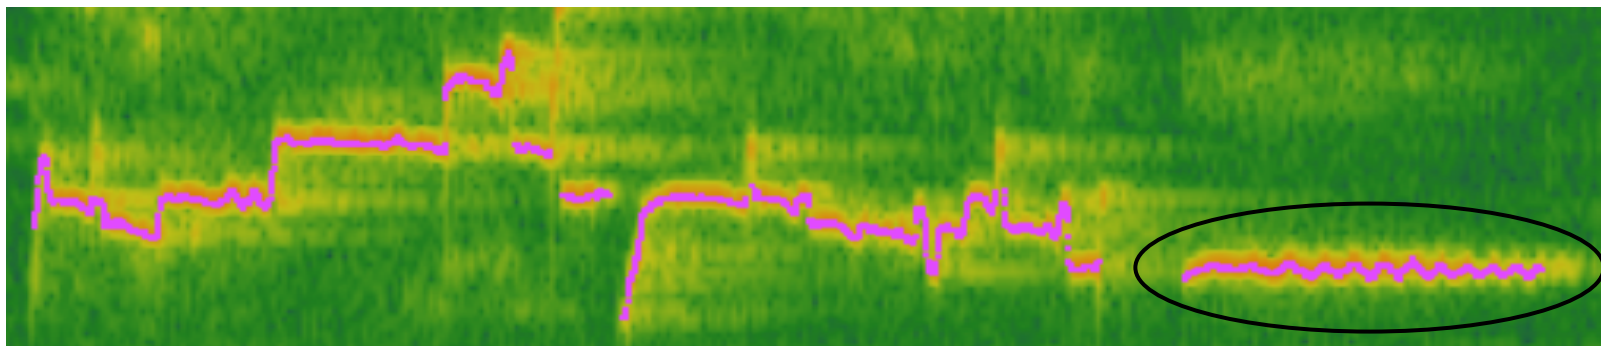

Test Datasets

Tonic Test Dataset

- Tonic frequency of 257 audio recordings associated with 57 compositions
- Tonic frequency of 3384 audio recordings manually annotated.

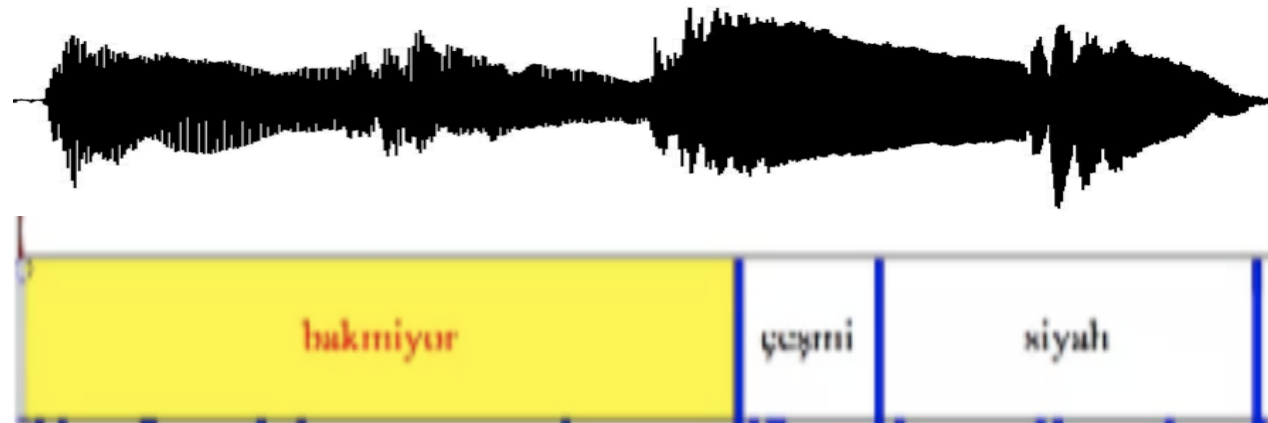

Test Datasets

Audio - Lyrics Alignment Test Dataset

- Lyrics of 10 songs manually divided and aligned.

Conclusion

- Music Information Retrieval and Computational Musicology
- Possible Research Task,
 - Structure Analysis
 - Automatic Tonic Identification
 - Automatic Ornamentation Segmentation
 - Melodic Phrase Segmentation
- We are open to contributions!

THANK YOU
